MODERN DESIGN
MADE BETTER

2 / 13

MODERN DESIGN, MADE BETTER.

Our cabinet system curates the best of designer style with uncompromising quality. It's the custom modern look you want, at near-stock prices.

How? We focus on creating the cabinet fronts—you know, the part you actually see and touch—in the best designs and using the best materials. As for the rest of the cabinet, we let you make use of IKEA's base box (it doesn't have to do much) and Blum's European quality hardware. The result: a high-quality, custom designer look at an accessible price.

QUALITY MATERIALS DESIGNED TO LAST

We combine hardwood veneers with layers of real wood beneath for a dimensionally stable cabinet front. No warping, no peeling, no compromise.

3 / 13

RESPONSIBLY MADE, ETHICALLY SOURCED

Our cabinet fronts are free of harmful finishes and plastic veneers. Not only does real hardwood look and feel better than typical MDF-core cabinetry, but it lasts longer and is better for the planet.

CURATED DESIGN MAKES CHOOSING SIMPLE

We collaborate with designers for a chic collection of styles with a modern edge. Our curated catalogue means you don't have to flip through thousands of options to find the perfect modern style for you.

A BETTER SOLUTION THAT'S FASTER

Place your order and we'll have the cabinet fronts to you in 3 weeks. It's a designer look with a turnaround time that can meet fast-paced renovation schedules.

THE WHY

01 Three styles in oak and walnut hardwoods allow clients to choose the modern look that fits their unique identity. They select their style and finish, and we deliver the cabinet fronts in 2-3 weeks. It's a better solution, faster.

It started with a dilemma. Designers and clients were coming to us with a question: can you make high quality, simple, modern hardwood cabinetry for kitchens and vanities? The catch: it needs to look custom, but at stock prices and with quick turnaround times.

The solution? Walnut and Oak's new Cabinet System. We manufacture 100% real wood cabinet fronts using our high-tech, high-touch process that attach seamlessly to standard IKEA Sektion cabinet systems. It's an innovative answer to getting a custom modern look, but at an affordable price point. Our materials approach combines hardwood veneers with layers of real wood beneath for a dimensionally stable cabinet front. No warping, no peeling, no compromise.

COLLECTION

Bringing powerful lines, the Linea style introduces height, dimension, and interest to your kitchen while retaining the classic elements of oak hardwood.

DESIGN TIP

The Linea style is a great way to add visual texture and interest to your kitchen cabinets. It's a unique, modern look.

With its sleek frame and minimalist design, the Cubrio effortlessly brings a modern high-contrast edge to a classic cabinet style.

DESIGN TIP

A modern take on the shaker-style cabinet, Cubrio lends a timeless look to any kitchen design.

Offering the perfect balance between simplicity and edge, the Moderno look brings new-century style into any kitchen.

DESIGN TIP

The Moderno can flow seamlessly into most designs. It's a great option to consider if you're working with existing components like a backsplash or counters.
